Laura Roesslein, Village Administrator/ Treasurer
Village of Twin Lakes
105 E. Main Street
Twin Lakes, WI 53181

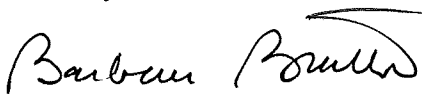

Dear Ms. Roesslein:

As we did last year, we are requiring each municipality that intends to exempt itself from the Kenosha County library tax levy pursuant to Section 43.64 of the Wisconsin Statutes to approve a resolution stating the municipality's intent to exempt itself from the 2024 Kenosha County library levy. This more formal process is necessary to meet the county's schedule in preparing its 2024 budget and to ensure that you are exempted from the county library tax.

Attached is a sample resolution that will accomplish this. The resolution includes the minimum levy for public library service that the Village of Twin Lakes must appropriate and expend for a library fund in 2024 to exempt itself from the county library tax. In order for this exemption to be considered for preparation of the 2024 Kenosha County budget, your certified resolution must be received by the Kenosha County Library System by noon on October 13, 2023.

If you have questions on this, please feel free to contact me at 262-564-6324. Thank you very much for your cooperation in this matter.

Sincerely,

Barbara Brattin, Director
Kenosha County Library System

Project: Sanitary Sewer Grouting – Twin Lakes, WI

Visu-Sewer is pleased to offer the following service:

Pressure grouting various joint leaks as identified within seven (7) different 8” mainline sewer pipe segments in the Village of Twin Lakes, WI. Visu-Sewer will provide all labor, equipment, and material to complete this project. Price assumes that the grout packer can traverse the entire pipe section. If needed, removal of obstructions (i.e. roots, protruding taps, mineral deposits, etc.) will be completed at the T&M rate below. Heavy cleaning will be priced separately if needed.

Time & Material Rate:

Labor & Equip. - \$350.00 per hour (port-to-port)

Material - \$12.00 per gallon (AV-100 grout)

(Estimate of (+/-) 40 hours and (+/-) 35 gallons of material)

Estimate
Total \$ 14,420

Note: With decades of experience sealing leaks and rehabilitating collection systems, it is Visu-Sewer’s experience that the most practical and economical way to remove infiltration is to test and seal every joint within a pipe segment or setup, rather than performing a complete setup for only one or two joints in that segment. Infiltration can and will migrate to surrounding joints if not sealed which would require more investment in the future, and not accomplish the goal of removing infiltration.

The Village of Twin Lakes shall provide access to all manholes, water from nearby hydrants without charge, a dumpsite for any captured debris, and traffic control beyond cones and signs. Actual mobilization, time on site, and material pumped will be billed upon completion. Thank you for the opportunity to quote this project. If you should have any questions please do not hesitate to contact me at 262-695-2340.
